

Oracle Academy NetSuite Eligibility Requirements

NetSuite is a completely cloud-based software as a service (SaaS) solution. This means Oracle Academy Institutional members who would like to incorporate ERP, CRM, eCommerce or supply chain applications in their curriculum do not need to install software on or maintain desktop or other on-premise systems.

If you are interested in using NetSuite to give your post-secondary students an authentic learning experience using industry-leading cloud applications, you must meet certain eligibility requirements. We have put these requirements in place to help ensure that you and your students have a positive and successful learning experience.

As long as your hardware and infrastructure meet our system requirements, you can use NetSuite with just a web browser.

The NetSuite eligibility requirements are:

- Your institution must be an active Oracle Academy Institutional member and meet the Oracle Academy eligibility requirements.
- Your institution must be a post-secondary educational institution, i.e., a two- or four-year college or university.
- As an educator with the Oracle Academy member institution, you must have an Oracle Academy educator account associated with an active Oracle Academy Institutional membership and meet one or more of the following requirements:
 - previously taught NetSuite in a classroom
 - certified in one or more NetSuite products
 - previously taught with a SaaS ERP, CRM, eCommerce or SCM product other than NetSuite
 - be willing to take free NetSuite training to ensure product familiarity

Thank you for your interest in Oracle NetSuite.
