Institutions and their educators can use our free modular curriculum and learning pathways to help learners expand knowledge, develop career-ready skills, and innovate. Our curriculum and resources are created by educators for educators, to offer computing education course pathways spanning from one semester to three years. Member educators receive access to professional development, curriculum, software, and teaching resources.

For object-oriented programming (Java), Oracle Academy courses Java Fundamentals, Java Foundations and Java Programming are designed for secondary school and higher education learners.

Artificial Intelligence with Machine Learning in Java is suited for more advanced students who have gained fundamental knowledge of object-oriented concepts, data structures, recursion, and Java terminology and syntax from those previous courses.

With Oracle Academy curriculum, students engage in hands-on learning in Java and also develop problem-solving, collaboration, and critical-thinking skills to help them become career ready across industries.

Oracle Academy offers educators rigorous, engaging computing education curriculum that employs industry-leading technologies to spark student curiosity and imagination and teach critical technology knowledge and skills.

**JAVA CURRICULUM**

**Java for AP Computer Science A**
Introduces secondary/high school students to Java knowledge, skills, and hands-on practice and prepares them for the College Board AP Computer Science A exam and Oracle Java Certified Foundations exam (1Z0-811).
180 Hours

**Java Fundamentals**
Engages students who have little or no programming experience. They are introduced to object-oriented programming concepts, terminology, and syntax using hands-on, engaging activities on easy to use Java platforms to scaffold their knowledge and create basic Java programs.
90 Hours

**Java Foundations**
Engages students who have little Java programming experience using a standard Java editor. They are introduced to object-oriented programming concepts, terminology, and syntax, and the steps required to create basic Java programs.
90 Hours

**Java Programming**
Builds on the skills gained in Java Fundamentals or Java Foundations to help students advance their Java programming skills. Participants design object-oriented programming applications and programs with Java using hands-on, engaging activities.
90 Hours

**Artificial Intelligence with Machine Learning in Java**
Building on the skills gained in Java Foundations and Java Programming, students learn and practice machine learning concepts within artificial intelligence. They are introduced to the terminology, syntax, and steps required to create a machine learning solution in Java using hands-on, engaging activities.
40 Hours
